College or Career?

Last week's FLEX lesson continued our introduction to career choices. Students learned information to help them understand the difference between on-the-job training, technical school, an associate's degree, and a bachelor's degree. They also learned how they can best prepare themselves for the career that they are interested in. I encouraged students to talk to their parents about their interests and urged them to ask questions about your education, training, and career path. It's never too early for students to start thinking about their futures.
